

blink BLINDS + GLASS

Minnkota Windows is proud to introduce an update to our popular Blinds Between the Glass (BBG) product. By popular demand, the size allowances have been increased to allow for BBG in smaller window units and we've added all Euro Series products to the list of available windows.

blink Blinds + Glass Size Chart

Certain size limitations apply for blink BLINDS + GLASS that include, but aren't limited to, 17 sq. ft. for glass. Various ranges for each window type are listed below. Contact Territory Manager for more details. All measurements listed are unit frame size.

blink Blinds + Glass Color Options

Below are the blink BLINDS + GLASS color options on the left. The colors on the right represent the recommended best window color match. Printed colors aren't always accurately represented so please see your Territory Manager for actual product color samples. (No silver windows available.)

White

White (Int. & Ext.)

Sandstone

Almond (Int. & Ext.)

Tan

Clay/Dakota Sand

Espresso

Brown (Ext. only)

Slate Grey

Bronze (Ext. only)

Silver

eNVIision Users: The software will ALWAYS default to white blinds if selected, regardless of the interior window color. Ensure you select desired color if you want something other than white.
